Laboratory Technician - Analytical Service (m/f/d) Tulln an der Donau - On Site

What you'll do

We are looking for a highly motivated person to become part of the ISO 17025 accredited Romer Labs Diagnostic GmbH / DSM and strengthen the team with expertise in Analytical Chemistry.

Your key responsibilities

- Perform routine analyses of mycotoxins in feed and food by chromatography according to international standards independently and report in time
- Perform routine analyses of mycotoxins and allergens by ELISA according to international standards independently and report in time
- Document all activities according to good documentation practice to comply to internal and ISO standards
- Process inter-laboratory tests and participation in validations
- Participate in the development of new and improvement of existing mycotoxin testing methods
- Answer customer requests and give advice in selection of testing methods and interpretation of reports
- Actively share ideas on possible process improvements

You bring

- Scientific education (Bsc or equal) in analytical chemistry, food chemistry, chemistry or related field
- Experience in working with chromatography and ELISA
- Accurate, structured and independent working style with excellent documentation practice
- Fluent in English and/or German

We bring

- An environment where you can grow and share your ideas
- The encouragement you need to develop and achieve your goals
- State-of-the-art laboratory equipment in our research facilities
- Parking available and public transport (city train Vienna - Tulln - Getzersdorf - St. Pölten) in close walking distance
- Diverse employees who aren't afraid to think outside of the box
- A team that truly cares about sustainability, each other and our customers
- Type of employment: 38.5 hours/week, full-time, permanent contract
- We offer you an income that is based on your qualifications and market conditions, starting at a yearly gross salary of € 33.600

About Romer Labs

DSM is the new home of ROMER LABS. By offering diagnostic solutions and a broad range of innovative test kits for detecting food allergens & pathogens, mycotoxins and more, Romer Labs strengthens the DSM portfolio in the area of feed and food safety.

How to apply

Interested in this position? Please apply online by uploading your resume via our career portal. The procedure will generally be in line with the DSM application process outlined on the DSM career website. Due to privacy regulations we can only actively interact with applications via our career portal.
